

# LARSEN STRINGS

for Cello — *'It's all about the music'* —

## Larsen Magnacore®

The Perfected Set: An extremely well balanced set for the professional cellist offering a charismatic sound with an almost endless palette of colours.

We have added a lovely edge to the sound, nice and bright so that it carries but still with that characteristic Larsen roundness. These strings offer many sound shades, from bright to dark, combined with a new clarity and brilliance. While the D medium and strong have almost the same tension level, they differ in sound colour. The medium delivers a rich depth to the instrument whilst the strong provides a brighter almost song-like clarity.

Magnacore G and C produce an incredibly warm and focused sound offering a wealth of overtones, tremendous volume and exceptional string response –even when played in pianissimo. Playing-in time has been reduced to an absolute minimum to deliver outstanding string performance instantly.

The Magnacore Medium configuration offers a wonderfully sonorous and broad sound with a unique ease of playability which is particularly suited to cellos with a neutral to bright timbre. Our Strong variant is even more powerful, focused and direct. We can recommend Magnacore Strong for all set ups but in particular for the darker and deeper sounding instrument.

### String Details

The Magnacore A and D are made on a solid steel core and wound with high quality precision rolled flat wire. Magnacore G and C are made on a concentric multi-stranded steel core and wound with high grade tungsten and precision rolled flat wire.

Aiming for sustainable solutions: at Larsen Strings the aim is to progressively work toward sustainable solutions in the way that we operate as a company. Some steps are small and some, such as our decision to upgrade to a CO<sup>2</sup> neutral electricity plan are larger steps towards our destination.
