ESPECIALLY RECOMMENDED IN:

Sports facilities

Hospitality

Education

DESCRIPTION

Portable speaker with Bluetooth/USB/microSD/FM/LINE player and 2 UHF wireless microphones (1 hand-held, 1 head-worn). This speaker will accompany you at all your parties, performances or live talks as it provides a multitude of playback options in a small size, a 250 W maximum amplifier, microphones (wired and wireless) and a lithium battery. Its great sound power will allow you to cover events of about 50 people, with excellent audio quality offered by its great definition in treble and bass reinforcement BASS REFLEX. MALIBU-312 incorporates everything you need to amplify the sound. Includes two wireless microphones, one being hand-held, and the other head-worn, and two microphone inputs for connecting other microphones via cable. You can perform karaoke by activating the Voice Canceller function that cancels the voice of the music, assign voice priority to fade the music while speaking into the microphones, and independently control the volume, BASS and TREBLE of the player and microphones. It also incorporates a guitar input and a line output from the player so that another speaker can be connected. It has a Bluetooth®, USB/microSD, player, radio or line-in with remote control. The player allows you to configure the sound to your liking thanks to preset equalisations and 2 manual controls for BASS and TREBBLE. In addition, the microphone signal can be recorded and, with its TWS function, it offers the possibility of simultaneous playback over 2 speakers in stereo using the Bluetooth connection. Highly versatile, adaptable to a multitude of uses and easily transportable thanks to its trolley design and highly efficient lightweight components, such as the Class D amplifier and the rechargeable Lithium battery, which requires little maintenance and provides great autonomy. It is a simple and intuitive to use speaker that minimises setup time and makes it suitable for all types of users, even those without extensive audio knowledge. Ideal for family parties and small events; or for more professional users, for classes, courses, presentations or artists who want to do small live performances or music recitals with guitar.
